# THOMAS ENGINEERING COATING PROCESS OPTIMIZATION

Since its inception in 1959 Thomas Engineering Inc. has been the leading name in the field of tablet coating for the pharmaceutical, nutritional and Over-The-Counter (OTC) markets. Thomas Engineering offers unprecedented levels of knowledge and is committed to providing our customers with the maximum return on their investment for the system we supply. Our mission as a company revolves around accomplishing three basic objectives– innovation, service and value.

## COATING PROCESS OPTIMIZATION

The following areas can be investigated:

- Coating process parameters and recipes
- Mixing procedures
- Operating procedures
- Maintenance procedures
- Cleaning procedures
- Condition of the coating equipment
- Potential equipment upgrades and improvements
- Visits can be structured to focus on the entire coating operation or only one or two different products
- At the end of a coating process optimization visit, a comprehensive report covering findings in each of these areas will be provided
