

DOWNTIME DUE TO WORN OR DAMAGED PARTS IS COSTLY!

Consumable Spare Parts Kit

- This kit consists of parts which will wear due to daily use.
- Includes spare parts required for preventive maintenance and GMP replacement.

Emergency Spare Parts Kit

- This kit consists of components not readily available off the shelf.
- Includes components recommended to be kept on-site to minimize downtime in the event of a component failure.

Let's face it, you purchased your coating system to produce product. It pays to keep replacement spares (consumable and emergency) in your inventory so that downtime is minimized when component failures occur.

Thomas Engineering offers spare parts kits to keep you up and running.

**Customized spare part kits are available to meet your needs!
